

PRESS RELEASE

conet Presents Best Practices for Digital Resilience in the Energy Sector at E-world 2026

Future-Ready IT Architectures for Secure and Sovereign Critical Infrastructure

Bonn, January 27, 2026. conet will present practical IT and digital transformation solutions for the energy sector at E-world energy & water, taking place from February 10 to 12, 2026, at Messe Essen. At booth 5D133 in Hall 5, the full-service IT provider will demonstrate how **digital transformation can be implemented securely, economically, and in compliance with regulatory requirements in highly regulated environments**. Under the claim “Leading Forward Digital Resilience.”, conet addresses increasing demands related to security of supply, regulatory compliance, and long-term technological viability.

Balancing Security and Innovation

conet focuses on integrated solution approaches that combine operational stability with innovation. The company will present IT architectures designed to **meet strict security and compliance requirements while ensuring digital sovereignty**. Sovereign cloud and data platforms provide the foundation for resilient and scalable IT environments. On this basis, conet shows how resilient asset management supports high availability in critical infrastructures and how AI-based applications can improve operational efficiency – while maintaining full data control and transparent system governance.

Solutions Proven in Security-Critical Environments

Visitors to the conet booth will gain insight into solutions that have been successfully deployed in security-critical contexts. These include **sovereign cloud architectures, intelligent data platforms, SAP solutions, and AI-driven process optimization**. conet’s approach transfers proven concepts from highly regulated sectors to the specific needs of energy suppliers, grid operators, and municipal utilities.

KRITIS Expertise from Highly Regulated Projects

With nearly **40 years of experience delivering projects for security-critical clients**, conet brings deep KRITIS expertise from work with the German Armed Forces and other highly regulated organizations. This experience directly informs solutions for the energy sector, supporting resilient digital structures and reliable energy supply.

“Digital resilience does not result from isolated technologies, but from a coherent interaction of architecture, processes, and governance,” says **Kai Drücker, Chief Commercial Officer (CCO) and Executive Vice President Digital Advisory Services** at conet. “In the energy sector, security, sovereignty, and efficiency must be considered together from the outset.”

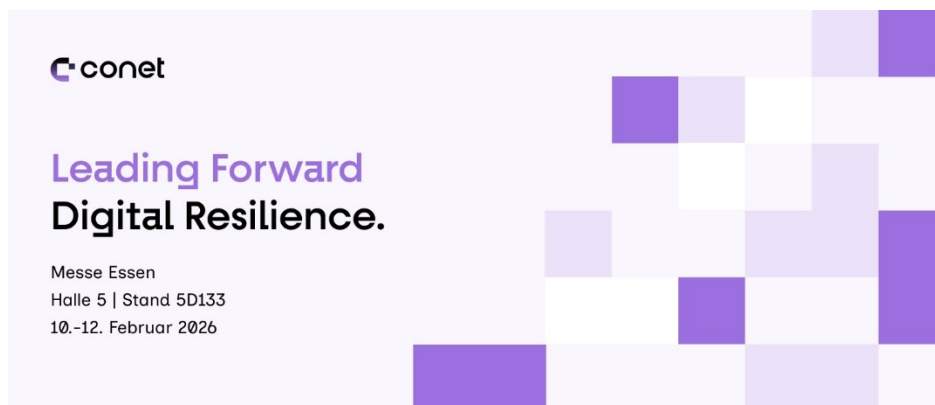

conet invites industry professionals to schedule a meeting with its experts at the booth in advance. Appointments can be arranged via email at events@conet.de.
